

SENATOR NORE: Mr. President, I rise in support of LB127. In LB127 we aren't forcing, we are motivating, that is the purpose of the whole program. We must take preventive measures, let's start at the root of alcohol on these folks, how do they get started on alcohol. Usually it is nipping, we can put coarses in our schools from the kindergarten on up to the colleges of the physical effects and the, we know that alcohol is the causes and is the basis of the causes of the stem of most of our crime, our marital problems and many of the evils that effect this civilization. For instance, in the armed services, I have had so many parents say well now my son, he didn't drink beer or use alcohol until after he came out of the service he did. In fact, I have one neighbor who had to take his home farm away from the son because he was spending too much time in the bar, he wasn't farming. Now alcohol has been one element in our past civilization. We have, I think history will prove that there are four items that have caused 19 of our 21 civilizations to fade and go out of existence, one of them is alcoholism, socialism, atheism, materialism, and I think that this is a real good piece of legislation but I think that we should use it as a motivating force as a teaching tool to keep these folks from getting started from nipping, and when this bill comes up to allowing alcohol on the University and state colleges, that is one place which would hit this thing hard and not allow it.

PRESIDENT: Now Senator Kelly, everybody else is passing and I think, Senator Lewis did you want to be heard? I am sorry Senator Kelly, he had his light off and I was afraid he was passing and go ahead Senator Lewis.

SENATOR RICHARD LEWIS: No he wasn't passing. I want to support Senator Carpenter in this. I have been a member of the advisory group for the commission on alcoholism and I have worked with the alcoholics anonymous closely the last couple of years, I know they have a deep interest in this bill. It perhaps isn't everything that we should have in a bill but I think that it serves a very useful purpose in that it does correct some of the problem areas that have proved to be a hinderance to some of these programs at the present time. I certainly would support Senator Carpenter in bringing his bill back.

PRESIDENT: O.K. Senator Kelly?

SENATOR KELLY: Mr. President, colleagues, I rise to support Senator Carpenter in bringing this bill out. The criticism that I have heard of 127 is that it may be a little bit ahead of its time that we don't have the proper facilities in the community to handle the load that will be there, which comes first the chicken or the egg? Let's take either one.

PRESIDENT: Senator Chambers, the Chair assumes that you are passing. O.K. Senator Luedtke?

SENATOR LUEDTKE: Mr. President and members of the Legislature, Senator Barnett did a good job of explaining why the committee did reluctantly indefinitely postpone this bill at this time. It was merely a matter of getting so many divergent ideas on how to do a job. I don't know how many times that we came back together and spent hours and hours that Senator DeCamp said trying to get all the interested parties who want to implement this legislation, try to get them together. We absolutely grew weary of every time that we would get one particular idea put into a legislation, somebody who should be for the bill said that will never work and we have started over and over again, and so we finally decided that in order to get these heads together and I mean somebody has got to just bring these people
